## Reading • Part 2

---

### Questions 6 – 10

The teenagers below all want to visit a sea life centre.

On the opposite page there are descriptions of eight sea life centres.

Decide which sea life centre would be the most suitable for the following people.

For questions **6 – 10**, mark the correct letter (**A – H**) on your answer sheet.

---

**6**

Maria is studying sea creatures that are disappearing due to environmental changes, and wants to attend a talk about them. She's also interested in learning about what's living on the beaches nearby.

**7**

Cameron's art project is on colourful fish so he wants to draw some, and take home some photos of unusual sea creatures. He and his family also want to swim at the centre afterwards.

**8**

Josh is interested in tiny sea animals, and wants to actually handle them and learn what conditions they need to live in. He'd also enjoy seeing a feeding session for the larger creatures.

**9**

Harry is interested in creatures living in cold climates, and how they find food. He'd like to create something for his art homework too, and learn about photographing underwater wildlife.

**10**

Samantha would love to swim with fish at the centre. She'd also like to learn about a range of sea environments, and about unusual creatures living at the bottom of our oceans.

## Centres

### **A Goldenwave**

Come and see the variety of warm sea environments at this centre – and creatures so small you might not have noticed them living on the beach, or the most beautiful fish living in our oceans. Bring your camera and learn to take the best photos ever!

### **C Splashdown**

Perfect for family fun – our tropical swimming pool that's only divided from the penguins next door by a wall of glass! See them swimming in their pool while you're in yours! And don't miss their mealtimes - watch as they dive for their food.

### **E Brightworld**

Many creatures here are normally found in environments with low temperatures, such as our big group of penguins. Come and see our amazing displays of photos showing these birds diving for their supper! There are also short talks on using your camera for great shots of fish, and painting sessions, too.

### **G Oceanwatch**

The focus is on science here – there are films throughout the day about oceans around the world and the environmental problems facing marine wildlife. There's plenty to learn, and lots of souvenirs to buy! Free brochures full of information.

### **B Rockwater**

We have sea creatures from both warm and cooler waters in our huge glass tanks. You can even go into the water in one, accompanied by staff – ask at the desk! We've also got fish that are rarely seen, as they're normally found in the very deepest water on our planet. No photography is allowed.

### **D Waterlife**

We've got some of the rarest fish in the world, and the most beautiful. See the clown fish with its bright yellow and white stripes! Cameras aren't allowed, but amazing professional pictures are available in our shop. Then once you've seen everything, relax in our fantastic warm pool – strictly for humans!

### **F Marine Life**

Keen to protect our oceans? Come and see the work we're doing – there are presentations about it every hour. For example, we try to help shark numbers worldwide remain at healthy levels. And visit our amazing rock pool displays full of tiny creatures, typical of ones that make their homes near the sea just metres away!

### **H Waterlife**

See some of the smallest sea life such as shrimps and starfish at our rock pool display - and even pick them up! Find out how clean sea water is essential to these creatures, and the effects of pollution. And don't miss watching the penguins and seals have their lunch – that's really popular!
